Purchasing and Redeeming Access Codes with an LTI Integration

1. Login to your school’s LMS and go to the course containing the labs.
2. Your instructor should have placed a link to the labs somewhere in the course.
3. Your instructor names the link, but typically it’s called “Infosec”, “Lab”, or “Virtual Lab”. Below is just an **EXAMPLE** of what you might see.

![Example of a course structure](image)

4. Once you click on the link we will automatically create an account for you. This is where you will be asked to redeem your access code or you can **PURCHASE** one directly from us.
5. You only have to purchase or redeem your access code once. After that you will simply click the link in the LMS and will be taken directly into the environment.
6. You should always be logged into your school’s LMS before trying to access the labs.
