

Millersville University is currently working with a consulting firm to conduct a space utilization study. The space utilization study includes the Student Memorial Center (SMC). The firm will make a series of recommendations to assist the University in maximizing the SMC's full potential to meet our growing needs. As a result, it is very likely that a realignment of space within the SMC will occur by the start of the next academic year. It is also possible that some areas within the building could be remodeled to create new opportunities for students and organizations.

I will be arranging several meetings to gather additional input from you, our students, on the realignment of space within the SMC.

The meetings will be held on Thursday, April 13 during Common Hour (12:05 pm-1:10 pm) in the Student Memorial Center, Room 118 and on Wednesday, April 26 at 5:00 pm-6:00 pm in the Student Memorial Center, Room 118.

I look forward to meeting with you.

**Brian P. Hazlett Vice President**
