Keeping the internet safe & secure is our shared responsibility. You can make a difference this #CyberAware Month. Join Millersville IT and the MU Cyber Defense Organization every Tuesday in October for informational sessions about becoming a more #CyberAware campus.

Come visit us at our table near the Juice Bar from 11:30am till 1pm followed by a classroom presentation and discussion in SMC 203 from 1 - 2pm.

In the coming days watch for an email inviting you to take part in a short online training about Ransomware. It will come from muncsam@millersville.edu and have the subject.

Remember, keep a clean machine! Having the latest security software & operating system is the best defense against cyber threats.

Join the discussion on Facebook at https://www.facebook.com/muncsam/
