Nobody cooks up a murder mystery better than the “Queen of Crime” or, as she preferred, the “Duchess of Death” ... Agatha Christie!

Here is the recipe. Bring ten very unique men and women on a remote island. Add a dash of bad weather ... thus isolating them in a large, mysterious house. Slowly stir in bits of information, which identify each person as a potential victim or murderer. Sprinkle in the verses of a classically creepy children’s rhyme. Stir vigorously and allow the bodies to pile up. The result is an evening of deadly fun!
