

Construction is underway at the intersection of Frederick and Duke Streets in Millersville.

This project will continue through June 2 and will impact traffic, as well as the campus shuttle. The loop around campus will take 10 minutes extra so the new roundtrip for the campus shuttle will be 30 minutes. This will also have an impact on the total number of trips offered. The updated schedule and a map of the loop are below. Updates and/or additional information will be communicated through Ville Daily.
