

In support of Millersville University's commitment to health and wellness, the University will be offering the free influenza vaccine to faculty and staff for the 2017-2018 flu season.

Unfortunately, we are not able to offer this free vaccine to retirees, employee family members, and those employed through temporary agencies (i.e. Spherion, Keystone Staffing).

The first Flu Clinic* will be held on Friday, September 22nd 12-3pm at Health Services in the Witmer Building.

No appointment is necessary. Please enter at the east end of the building, by the parking lot (not through the front door.)

You must bring your Millersville University Employee ID with you.

*More Flu Clinics will be available soon. Another Ville Daily Posting will let you know of these dates.

For questions or concerns regarding Employee Flu Vaccination, please contact the Office of Human Resources at extension 4950 or human.resources@millersville.edu. Please do not contact Health Services.
