

Winter Storm Toby Aftermath

The first couple days of spring came in with a bang! The snow event from Tuesday night through Wednesday dropped 16 plus inches of snow on Millersville University.

The Facilities Management Department has been working long hours to clear roads, parking lots and sidewalks throughout campus. Emphasis was clearing the Quad area (Villages, Gordinier and SMC). Unfortunately, the heavy snow also caused several equipment breakdowns which negatively impacted the University's capability to plow snow.

As you return to campus, you may notice several parking spaces may not be accessible due to snow piles. Some shortcut paths will not be cleared. Additionally, clearing the residential hall lots was difficult with all the parked cars. The plow operators did their best to remove snow from the main drive lanes to allow access for emergency responders while trying to avoid damaging any cars. To help mitigate being plowed in, the Prince Street parking garage by Jefferson Hall was opened up for resident students during the snow event. If resident students need to dig out, they can contact the Housing Staff for shovels.

If you notice any unsafe or uncleared walkways, please contact the Facilities Management Department at 717-871-7875.
