

Facilities Management Department Notice Recent Heat Wave - UPDATE

To the Campus Community:

As forecasted, the heat wave appears to have passed at least for this week.

Facilities Management is committed to fixing these issues as soon as possible and to return normal indoor conditions for learning, studying, teaching and living.

What Is Being Done:

Updates for the three buildings impacted the most are provided below:

Caputo Hall: The equipment has been repaired and building operations have returned to normal conditions.

Stayer Hall: The repair part has been received and will be installed today, Friday, August 31st. Barring any unforeseen conditions, this building should be returned to normal operations by the end of the day.

Lyle Hall – The Cove and The Grille: A temporary trailer mounted system will be installed today as well. Unfortunately, this trailer will be placed in the small roadway on the north side of Lyle Hall. We expect this temporary trailer will be in place for at least 60 days.
