

Rats for Adoption!

The Psychology Department Rat Lab currently has 16 rats for adoption. These rats were subjects in a behavioral study that began in April 2018.

They are...

- Approximately 1-year old (est. birthday 3/25/18)
- Intact (i.e., not spayed) females
- Strain: Long-Evans
- Friendly, good temperament

While we will adopt single animals out to good homes, rats are VERY social animals. Therefore, preference will be given to potential adopters who either have other rats at home or who would like to adopt two or more of our rats.

If you are interested in adopting, please contact Dr. Kelly Banna at kelly.banna@millersville.edu
