Lawmakers study ways to fix funding

Funding: Divvying state money for higher education

HIGHER EDUCATION

New commission co-sponsored by Aument eyeing how money is divided

GILLIAN MCGOLDRICK

Throughout the next year, a new commission of state legislators will meet to study the way it funds higher education in Pennsylvania.

With Pennsylvania ranked last in U.S. News & World Report’s “Best States for Higher Education” and No. 48 for tuition and fees, local higher education leaders say this commission is necessary if they want to attract students — and more importantly, students who want to live and work in Pennsylvania after they graduate.

Sen. Ryan Aument, R-Mount Joy, sponsored legislation to get the commission started. He was appointed to the commission by Senate Pro Tempore Sen. Joe Scarnati earlier this month. The commission met for the first time Tuesday and throughout the next year will hear from higher education policy experts about the needs of the state’s higher education institutions and best practices in other states.

In Pennsylvania, money for higher education is dis-

tributed to the Pennsylvania State System of Higher Education’s 14 universities, the four state-related institutions and the 14 community colleges. In the 2019-20 state budget, lawmakers appropriated nearly $1.34 billion toward all of these institutions.

Still, Pennsylvania spent $4,267 per student in 2017, falling well below the national average of $7,625 spent per student. This has Pennsylvania’s public colleges and universities bracing for lower enrollment rates as the college-age population decreases in coming years, while also trying to implement creative this month. “Maybe our funding ought to be aligned to that.”

Aument said on Wednesday that he’s bringing an “open mind” to the commission, which hopes to release a new funding formula for higher education next year.

John Sygielski, HACC’s president, said the community college sector hasn’t received the funding it needs to address the state’s workforce development issues. “We believe we are able to help the economy of Pennsylvania by providing the programs that our employers need, but many times we just need the funding to be able to provide those training programs,” Sygielski said.

result of the successful and industry-focused programs the college offers, Thaddeus Stevens President William Griscom said. This year, he said, there were 1,400 employers looking to fill 4,000 jobs. With 365 graduates, that’s 11 jobs available per graduate.

“(Pennsylvania has) significant infrastructure problems, we have an aging population, we have K-12 education (to fund) ... The pie is probably not going to get any larger for higher education,” Griscom said. “Finding the most rational way of dividing that pie is going to be one of the primary objectives of the commission.”
solutions to lower costs and make
the schools more attractive.

New funding formula ‘overdue’

All of the higher education
presidents LNP was able to reach
— Millersville University,
Thaddeus Stevens College of
Technology and HACC — said a
comprehensive look at how their
institutions are funded is overdue.
And all of them hope the
Legislature shifts its focus to
programs that are successful and
provide funding based on that,
instead of the institution’s historic
precedent in Pennsylvania.

Aument agrees.

“Not to discourage any student
from their academic passion, but I
think there’s a real question about
what we should subsidize, what we
should as a Commonwealth pay for
when in some areas, some academic
disciplines degree areas there’s an
oversaturation in the economy, and
other areas significant shortfall,”
Aument said in an interview in
Harrisburg earlier

PASSHE schools share the same
concern, said Millersville President
Daniel Wubah, adding that having
to divvy up money with so many
other universities often means it
needs to raise its costs to stay afloat,
unlike state-related universities that
have huge endowments, like Penn
State and University of Pittsburgh.
This has led Millersville to
creatively cut costs, like cutting its
housing and dining expenses by
3.4% this year and training
professors to use online textbooks,
which resulted in $250,000 in
student savings this year.

Fixing the funding mechanism and
increasing funding for successful
programs is just one part of solving
the higher education problems in
Pennsylvania, Wubah said.

“There’s no magic bullet,” Wubah
added.

in the 2019-20 budget, which is a
direct

Aside from his slot on the
commission, Aument plans to
introduce two pieces of legislation
to address higher education
problems, including a way to chip
away at student debt and a possible
EITClike program for businesses to
contribute financially to higher
education programs to set up a
pipeline between employers and
potential employees.

Sen. Scott Martin, R-Martic
Township, also is getting involved
in higher education issues. He was
appointed to the PASSHE Board of
Governors in July to take on some
of the problems the state system is
facing, including declining
enrollment.

Finding the most rational way of
dividing that (funding) pie is going
to be one of the primary objectives
of the commission.
