

Parking Changes on Campus this Fall

There will be a number of changes to parking patterns on Millersville University's campus during the fall semester.

- East Frederick Street has been reopened for one-way traffic and an additional 80 parking spaces have been created along both sides of that street.
- Parking spots in the East Villages Parking Lot have been reconfigured to accommodate an additional 102 commuter spots. This creates a total of 207 commuter spots in this lot.
- The Prince Street Parking Garage, located next to Jefferson Hall, includes 359 spaces for students and is always available.

All of these changes are working to counter balance the loss of parking spots in the Penn Manor Parking Garage due to construction at Penn Manor High School.

Students are encouraged to park in the Prince Street Parking Garage when possible, since there are abundant spaces available.

See below for a map that details these parking locations:
