

Campus Community,

We wanted to let you know that an injured deer became disoriented between Roddy and Caputo on campus yesterday afternoon, Dec. 5. Millersville University Police, a Pennsylvania State Game Warden and a biology professor were on the scene and determined that the deer's injuries were fatal. To keep it from being in further pain or from injuring students, the deer was put down.

The game warden removed the deer. There were no injuries reported.

If you have any questions, please email Millersville University's Police Chief, Pete Anders at pete.anders@millersville.edu.
