### OER Working Group Requests Participation in a Fall 2020 Textbook Survey

The purpose of the survey is to gather data nationally on student use of course materials and the financial impact on them. The data will be used by advocates of Open Education Resources to develop resources and promote outreach. Survey responses will be broken down by national, state, and institution levels and would be very useful to our campus Open Education Working Group. The survey was created by the United States Public Interest Research Group and data will be collected by Affordable Learning PA (ALPa). **All Millersville students are eligible to participate.**
