[Rayne Sperling Ph.D.](#)

Dr. Sperling is an Educational Psychology Professor and Associate Dean for Undergraduate and Graduate Studies in the College of Education at The Pennsylvania State University. Her research examines students' self-regulated learning and focuses on effective motivation, metacognition, and strategic processing for academic success. Her work also addresses effective instructional manipulations, in both traditional and technology-rich environments, that are designed to promote learners' self-regulation, comprehension, decision making, and problem solving. Much of her work addresses issues of objective-based student assessment, construct measurement, and evaluation.

Organized for Millersville University students and the community, the Zoom/Webinar Academic Resilience Speaker Series offer a space for students to learn and be provided with actionable strategies and advice about academic success during these difficult times.

February 18th at 12pm

Metacognition: Self-Regulated Learning and Memory Strategies
